PREFACE

Openness to multilateral trade is essentially intertwined with a country's economic fate. Realizing the truth of this statement, the Trade Development Authority of Pakistan (TDAP), the premier trade promotion organization of the country, is making profound efforts to enhance trade ties with its partners. Pakistan, through frequent participation in international trade fairs and delegations, has made its intent very clear — friendly trade relations across the globe.

About 83% of the world demand exists in the engineering and healthcare sectors. Pakistan offers a unique blend of affordable yet premium quality engineering and healthcare goods that have been perfected over the years through local demand and varying international trends. Most of the products have already established a niche in some of the most competitive markets in the world.

The Engineering and Healthcare Show is emblematic of the Trade Development Authority's efforts to promote trade in the engineering and healthcare sectors. The purpose of this exhibition is to enable international buyers to interact with leading Pakistan's manufacturers of these sectors.

The 1st edition of the show, which was held in February 2022, proved to be a tremendous success. It stole the limelight in the international media and attracted more than 325 buyers from African and Central Asian countries. It was a perfect platform which created an enabling environment for more than twenty product sectors to hold around 2100 B2B meetings. During the show, reported outcome of business deals was USD 47 million. Regulatory departments of 6 countries, presidents of chambers of 13 countries and trade promotion organizations of 6 countries participated in the event.

In the wake of the glorious success of the first event, TDAP has decided to make the Engineering and Healthcare Show a permanent feature of its Annual Business Plan. This time, TDAP has decided to highlight the engineering and healthcare sectors on a much wider horizon. TDAP has invited delegates from Africa, Central Asia, Gulf countries, China, Sri Lanka and Afghanistan to visit and explore the non-traditional sectors of Pakistan.

It is expected that the 2nd edition of the event will open new avenues of business opportunities with our partners.

Event Organizer

GOVERNMENT OF PAKISTAN
MINISTRY OF COMMERCE

MESSAGES

Muhammad Zubair Motiwala
Chief Executive
Trade Development Authority of Pakistan

Since its inception, the Trade Development Authority has been the flag bearer of trade development and promotion. In recent times, there has been a paradigm shift in the Authority's strategy as it has begun to prioritize locally executed exhibitions to showcase to the world that Pakistan's industry has ample potential to compete in some of the best markets of the world. We have organized Trade Development Conferences and Exhibitions in African and Central Asian countries. However, this time, through the Engineering and Healthcare Show, TDAP has decided to invite the whole world so they can see for themselves the precision and the perfection with which our affordable engineering products are manufactured for international supply chains. The same goes for our healthcare sector which has effectively captured the African market because of its quality yet affordability.

The previous edition of the event allowed Pakistan to strengthen trade ties in our targeted markets. This year, we hope to expand our outreach across the globe. We believe that it will also be an extraordinary opportunity for our delegates to familiarize with a market that has both the potential and the will to thrive.

Dr. Fareed Iqbal Qureshi
Secretary
Trade Development Authority of Pakistan

Following its mandate, the Trade Development Authority of Pakistan has assiduously worked for trade promotion through various channels.

The Engineering and Healthcare Show is one such forum that has built a reputation of highlighting our non-traditional export sector. In 2022, this neophyte event attracted 325 foreign delegates from 46 countries who held successful B2B meetings with our manufacturers and trade chambers. The tremendous success of the event could be gauged from the fact that in the immediate two fiscal quarters following the event, there was an increment of 18% in the exports of exhibiting sectors to targeted markets.

Upholding the same spirit, TDAP is organizing the 2nd edition of this grand event where the trade promotion organizations, trade associations chambers and regulatory bodies from all over the world will hold meetings with their Pakistani counterparts. Factory visits will also be organized for the delegates so that they can experience for themselves the quality of our manufactured goods.

We firmly believe that this grand event will open new avenues for Pakistan and its trade partners.

ABOUT LAHORE

Lahore- The City Of Attraction

Lahore has been city of attraction and capital of Punjab for nearly 1,000 years. Besides being the Mughal show-window, Lahore is the cultural, academic and main business centre of Pakistan. The city is beautified with palaces, gardens, monuments, eateries and mosques. During the British regime, many monuments sprang up in Lahore which blended beautifully with the Mughal, Gothic and Victorian styles of architecture.

Lying on the main trade and invasion route through South Asia, Lahore connects its geographical importance through strong road and air mode of transportation. The famous Grand Trunk (GT) Road, Lahore is linked with all major cities of Pakistan by road, rail and air. There are several daily flights, express trains and luxury bus services linking Lahore with Karachi, Quetta, Rawalpindi/Islamabad, Peshawar and dozens of major cities & towns of the country. A number of private transport companies like Daewoo Express, Sky Ways, Kohistan Bus Service etc. play regular air-conditioned luxury buses between Lahore and a number of main cities of Pakistan.

Besides PIA, a number of International Airlines (Singapore Airlines, Thai Airways, Uzbekistan Airways and Air India etc.) have their direct flights to Allama Iqbal International Airport Lahore.

With reference to textile industry, Lahore plays an eminent role for the trading side. The clothing sectors both woven and knits are mainly clustering in Lahore.
